Research & Industry Experience

Tencent, Platform & Content Group (PCG) Jan. 2026 – Present
Research Intern – Video Generation, World Models & MLLM *Shenzhen, China*
- **Video Generation – Reference-to-Video & Video Editing**: Working on reference-to-video (R2V) generation and video-editing pipelines on top of the *DiffSynth-Studio* framework; focusing on subject / identity-reference preservation and controllable editing.
- **World Models – Autoregressive Video Diffusion**: Reproducing the training and inference pipelines of the *Forcing* family – *Diffusion Forcing*, *CausVid*, *Self Forcing*, and *Causal Forcing* – which convert bidirectional multi-step diffusion models into causal few-step AR world models; studying recent interactive world models (Matrix-Game 2.0/3.0, Solaris, HYWorldPlay, LingbotWorld) and comparing their action-injection & long-horizon-memory designs. Blogs: asdfo123.github.io/blog/world-model.
- **MLLM Understanding – Video-LLM Knowledge Editing**: Co-first author of *Editing the Moving World: Model Editing for Video LLMs* (ACL 2026 Main); extending this line to study how Video LLMs internalize and update temporally-grounded knowledge, and how editing interacts with temporal reasoning.

Grace Investment Machine (GIM AI) & HKU CDS Jul. 2025 – Feb. 2026
Quant Research Intern (ML & AI) *Remote & Hong Kong SAR*

- Co-authored *Cognitive Alpha Mining via LLM-Driven Code-Based Evolution* (ACL 2026 Main), an LLM-driven code-based evolutionary search framework for factor / alpha discovery in quantitative finance.
- Built and evaluated LLM-based feature-engineering and multi-scale backtesting pipelines to refine trading strategies; the GIM internship grew out of the 2025 HKU CDS Summer Research Programme on LLM-based quant agents.
